2009 Yamaha FZ-6R **M2**V.A.L.E.™ Complete Exhaust System

FZ-6R

Two Brothers Racing (TBR), unleashes yet another top level full performance exhaust system, this time for Yamaha's all-new 2009 FZ6R.

The sporty and aggressive Yamaha FZ6R comes alive with the addition of Two Brothers Racing's 4-2-1 Full Exhaust System.

TBR's updated system compliments the FZ6R's MotoGP styling and R6 inspired stock exhaust placement while cutting excess weight and improving performance. The TBR engineers designed 6.3 more horsepower and 4.2 more foot-pounds of torque into their made-in-the-USA FZ6R full exhaust system.

"We're extremely proud of our new FZ6R full system." Joel Albrecht, director of R&D said. "From the incredible throttle response to the great mid-range torque, our new full system pushes the FZ6R towards the sport-bike category while keeping the easy-to-use power curve beginner riders appreciate."

In addition to bumping up the power, Two Brothers Racing's full system is 10 pounds lighter than stock: the result is improved handling and easier maneuverability. All Two Brothers full systems feature CNC-controlled mandrel bent, thin-wall stainless steel tubing and handcrafted merge collectors. The FZ6R full system utilizes TBR's exclusive V.A.L.E.™ muffler attachment system and is available with Aluminum, Titanium or exclusive Filament Wound Carbon Fiber M-2 Mufflers.

2009 Suzuki GSX-R1000 **M2**V.A.L.E.™ High Performance Exhaust Systems

GSX-R1000

Two Brothers Racing (TBR) - Southern California's leading performance motorcycle exhaust system designer and manufacturer—proudly releases two new Absolute Top Level™ exhaust systems for the awesome new Suzuki GSX-R liter bike.

Starting with a new and aggressive single-canister slip-on, TBR immediately dropped 17 pounds off the stock-equipped bike. But it doesn't stop with a simple diet. Performance numbers increase across the RPM range and particularly in the mid-range where it's most useful. A peak gain of nearly 11 horsepower is to be had at the top of the RPM band while the strong pull from the bottom is mirrored by an additional 2.8 ft/lbs of torque.

The single canister, cat-eliminator slip-on system brings true racetrack performance to Suzuki GSX-R1000 owners looking to win. Combined

2009 Suzuki GSX-R1000 **M2** V.A.L.E.™ High Performance Exhaust Systems

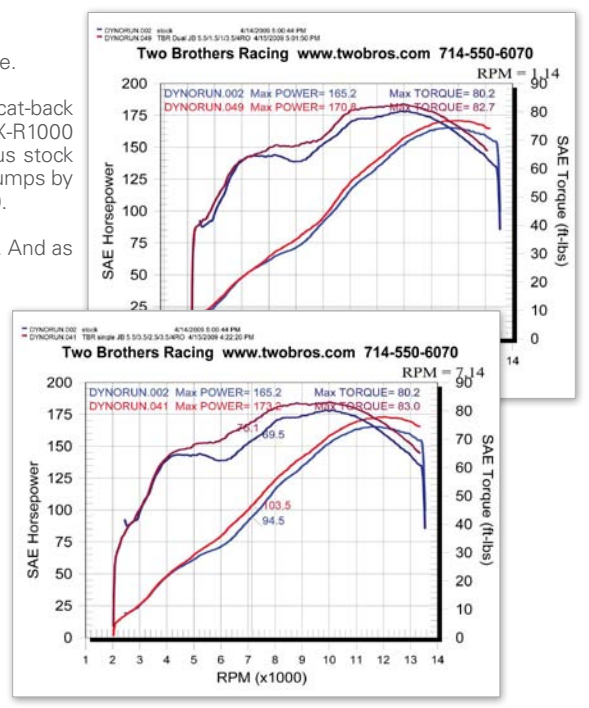

GSX-R1000 continued...

with the trademark TwoBros styling and quality, you'll have the hottest performing GSX-R of all time.

Riders looking for styling balance and a more toned-down sound will appreciate the new TBR dual, cat-back slip-on system. The Two Brothers dual slip-on system is faithful to the stock style of the 2009 GSX-R1000 but offers impressive performance gains, lighter weight and a way better look over the monstrous stock cans. With TBR's twin can system installed weight is reduced by five pounds and the horsepower jumps by 5.6 while torque is boosted by 5.8 ft/lbs. It's a very sweet upgrade for the 2009 Suzuki GSX-R1000.

Both systems are available in Aluminum, Titanium or TBR's exclusive filament-wound Carbon Fiber. And as always are hand built, designed and proven in their Orange County, California facility.

Learn more about Two Brothers Racing by visiting your local TBR dealer, going online at www.twobros.com or by calling the TBR experts at 800-211-2767.

TBR Sponsor Spotlight!

Jason Pridmore's **Star School**

For more information please visit www.starmotorcycle.com

The **Skills** and **Techniques** for **Advanced Riding** Motorcycle School was created to help you become a more proficient, more confident rider. Whether you're a street rider who wants to improve your skills to gain confidence and become a safer rider, or a track day junkie and racer looking for answers on how to go faster on the racetrack, the STAR Motorcycle School has a training program designed specifically for you.

Chief instructor Jason Pridmore is the 1997 AMA 750 Supersport Champion, 2002 AMA Formula Extreme Champion, and the 2003 FIM World Endurance Champion. He is also the only American to ever stand on the podium of a World Supersport race. JP has 21 AMA National wins and countless podiums. In 2009 he will be contesting the FIM World Endurance Championship for Team BK Maco Racing.

Supercross Lites East Schedule
 May 2 Las Vegas, NV

Two Brothers Racing and Team Suzuki City Join Forces - Orange County, CA - January 2009
 Two Brothers Racing is proud to announce its sponsorship of Team Suzuki City for the 2009 Supercross season. The team will be running Two Brothers all new custom shop built exhaust systems. Supercross veteran Matt Goerke and British newcomer Steven Clarke's race bikes will be outfitted with TBR's filament wound carbon fiber M-7 mufflers which feature one of the many custom color combinations available through TBR's custom shop. The Two Brothers complete exhaust system will provide the team with the competitive edge needed to contend for the East Coast Lites Supercross Championship.
www.teamsuzukicity.com

"We are extremely pleased with the level of support that Two Brothers has given us. The extensive R&D they have done with us has resulted in an incredible performing system for our bikes. We were really concerned about power loss with the new 94db limit this year, but they have managed to keep that from being an issue," said Team Suzuki City Team Manager Michael Nasakaitis. He also added, "The guys have been testing the new systems and are pumped, they work great and look awesome! It's definitely the coolest looking exhaust I have ever seen!"
